Crimp and Solder Heat Seal Butts

The **Multilink™ Heat Shrink Connector** is pre-loaded with a low temperature solder alloy ring that delivers a precise amount of flux and solder to the connection during the heat-shrink process. Each repair made with a heat shrink connector is individually protected from corrosion, contaminants, and current leakage.

Crimp Connector

- Seamless connector with inspection window
- Indicators for crimp and window location
- Wire-stop prevents over insertion

Solder Ring

- Flux coating to clean metal surfaces
- Pre-measured low-temp solder alloy

Heat Shrink Tubing

- Translucent adhesive-lined polyolefin
- Color-coded with wire gauge imprint

The HydraLink™ **Heat-Shrink Closed End Connector** has an active adhesive that seals up to four wires and eliminates pull out. Closed end connectors can replace spring connectors in environments where corrosion is problematic. Excellent wire nut replacement.
