

Arctic Superflex Blue® ATV Jumper Cables

RELIABLY BUILT TO KEEP YOUR TOYS GOING

PROUDLY MADE IN THE USA AND PROVEN IN REMOTE ALASKA

**PROUDLY
BUILT IN THE USA**
WITH TOP QUALITY
AMERICAN MADE WIRE

Polar Wire's ATV Jumper Cables are made exclusively with **Arctic Superflex Blue®** fine stranded double conductor wire for unmatched flexibility and durability. Our ATV cables are sized to fit the smaller batteries used in recreational vehicles and other equipment.

Strong

- Fast, reliable starts — no wasted time
- 100% Copper conductors — **NO ALUMINUM!**
- Solid Copper 100 amp continuous duty clamps and copper lugs deliver more current
- Unbeatable extreme cold flexibility to -55°C (-67°F)

Durable

- Tough, flexible jacket is highly resistant to abrasion, oil, gas, saltwater, acids, chemicals, sunlight
- Exceptionally easy to handle — won't tangle or kink
- Dual wall heat shrink applied at six points for strain relief and corrosion protection
- Extruded wear- and fade-proof polarity stripe for safety
- Built to the same rigorous quality standards as our full size **Arctic Superflex Blue®** jumper cables

Cost Effective

- Designed for LONG LIFE
- **LIFETIME** Limited Warranty on materials and manufacturing
- Easily repaired
- Replaceable clamps
